

4-4 Key Ball

The “key ball” holds a compression spring and an interlocking needle in the “key box”.
When the system is activated, the “key ball” comes out of the “key box” and a needle in the “key box” is released and punctures the seal of the gas cartridge to inflate the Hit Air immediately.
The “key ball” and the “key ring” are integrated parts.

4-5 Hit-Air structure

Hit-Air all-in-one airbag of polyurethane film is attached directly to the inside of the cover inflates and absorbs the shock of impact.

*Design and shape of model may vary.

4-6 CO₂ Gas Cartridge

- The gas cartridge contains CO₂ gas.
- When the “key ball” is released from the “key box”, a needle punctures the seal of the gas cartridge to let the gas go into each air cushion.
- Screw the CO₂ cartridge fully into the bottom until it cannot go any further. Otherwise, a needle in the “key box” may not puncture the seal of the CO₂ cartridge and Hit-Air may not be activated properly.
- Do not reuse the gas cartridge once used. Change it to a new one. The seal at the bottom of an used cartridge is pierced with a hole.
